**Whereas** Ball State University, as a signatory of the American College & University Presidents' Climate Commitment, is publically obligated to reducing its carbon footprint; and,

**Whereas** ethics of water use is a significant element of sustainability consideration;

**Now therefore be it resolved** that the Council on the Environment recommends:

That Ball State University requests that its colleges and departments exhibit principled best practice by providing tap water and reusable containers instead of using bottled water at student, departmental, college and alumni events.
