

Lower Member Out-of-Pocket Costs, Improve Satisfaction

RxSavingsPlus for Non-Covered Drugs (PENCD) helps plan members save money on non-covered medications.

The program allows members with prescription benefit coverage to purchase medications not covered by their prescription plan at a discount, **without undermining the client's chosen formulary strategy.**

Savings of up to 80% on generics and up to 40% on brand name medications

Average member savings of **55% for generics and 24% for brands**

Available at **no cost** to clients

Does not impact rebates – the program targets non-covered drugs only, not formulary rejects

Easy for Members to Use

The solution is integrated into the pharmacy benefit plan, so the experience is seamless for members. They simply present their CVS Caremark pharmacy benefit card and their prescription at one of more than 65,000 pharmacies in the CVS Caremark® Discount Network and get a discount on the non-covered medication.

Providing Savings and Safety

Member utilization data is captured from each claim to give pharmacists, providers and payors a more complete picture of each member. This helps ensure that critical safety measures can be performed, such as Drug Utilization Review, to help avoid adverse events. Third-party discount card programs do not have this capability.
